PROJECTS

Life Shield - Secure Your Tomorrow Life Shield is a modern insurance management platform designed to help customers easily explore various insurance policies, subscribe to them, and secure their future through seamless online payments. It is a full-stack MERN application featuring dedicated dashboards for Users, Agents, and Admins.

Code(Client) | **Code(Server)** | **Live Site**

Features:

● **Multi-Role Auth:** Multi-role authentication (Admin/Agent/Customer) Profile management with role-based access.

● **Advanced Policy Recommendation:** Smart filtering system that suggests relevant insurance policies based on user profile and preferences.

● **Real-Time Policy Status Tracking:** Users can instantly monitor policy progress (Pending, Approved, Paid) from their dashboard.

DakBox - DakBox | Smart Logistics & Courier Management System DakBox is a robust, full-stack, multi-layer courier management platform designed to streamline the process of parcel booking, rider management, and administrative oversight. Built with a modern tech stack, it features real-time tracking, secure payments, and data-driven insights.

Code(Client) | **Code(Server)** | **Live Site**

Features: DakBox features secure multi-role authentication with protected dashboard access for Admin, Rider, and Customer. The platform enables real-time parcel tracking, dynamic booking with automated charge calculation, and secure Stripe payments with full transaction history. It also includes automated rider earnings with a cash-out system and an admin analytics dashboard that provides data-driven insights on revenue, parcel volume, and user growth using MongoDB Aggregation.
